

To the FCC:

I want you to know the benefits of listening to XM Satellite Radio and its traffic and weather channels. XM Satellite Radio is available when I want it and provides me with variety and quality that are not available elsewhere. XM gives me lots of choices depending on my day. There's nothing like listening to Fox News at home on my TV while getting ready for work and then getting into my car and tuning in the same Fox News to listen on the way to work.

I travel a lot and it is nice to listen to the same programming station whether you travel 100 miles or 1,000 miles! I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

Respectfully, I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. The last thing needed is more regulation. Let XM listners enjoy radio freedom!

Thanks in advance for your consideration in this matter.

Keith Ayers
